

A new lease on life

for the electrical installation technique

« The Woertz
Company brings a
new lease on life »

Complete solutions for complex problems

Woertz is committed to quality meeting customers' needs and providing convenient solutions.

Modern buildings are complex systems which combine a lot of requirements. House builders and investors ask for energy efficiency, functionality, modularity and flexibility of use. Project planning and implementation have therefore to fulfil many requirements. In addition, time and cost pressure remain high. As a result both human and technical resources are very much in demand.

For ambitious projects Woertz offers intelligent solutions. Market-leading manufacturer of complete systems and components for the electrical installation technology, our commitment to quality, innovation and customer intimacy is absolute. As we combine various technologies we are able to produce a large range of products and systems that comply with our customers' requirements. What we produce combines aesthetics, reliability and cost-effectiveness in the long term.

Within Switzerland Woertz has achieved the reputation of being a reliable business partner. A reputation to preserve! As a medium-sized company we are clearly oriented on Switzerland and we feel obligated towards our employees and the environment. We aspire to economical success and further growth. We attach therefore a great importance to research and development.

Woertz is a combination of independence and tradition, quality and innovation, economic success and responsible action and behaviour, promotion of research and management for the benefit of both mankind and technique.

A family business with inventive talent

Providing innovative solutions allows Woertz a significant role in the electrical installation technique.

In 1928, as an innovative contractor, Oskar Woertz had the idea of simplifying the electrotechnical components according to the wishes of Swiss installers. Planers and craftsmen had their work facilitated. Investors and constructors could carry out their projects with the novel components quicker and with a higher quality. Briefly: thanks to innovative solutions Oskar Woertz made it possible to acquire maximal efficiency with minimal effort. It's therefore not surprising that it gave birth to a prosperous company which is still family-owned.

Woertz has about 230 employees active on two locations in Switzerland namely Muttenz and Hölstein. Carole Woertz is in charge of the management of this third generation family driven enterprise, one of the last companies in that industry to be family owned in Switzerland.

The advantages of being «Made in Switzerland»

As a Swiss family owned company Woertz is guided by core values: quality products and services, innovation and inventive talent for the research and development, reliability towards customers and employees. We are proud to provide products which are 100% made in Switzerland and to have developed solid and long term relationships with most of our customers.

In spite of the cost pressure of mass-producers, we do not deviate from our principles: our products are made in Switzerland meeting the requirements of the Swiss customers. This is the reason why we are leader in the internal market and committed to continual improvement. For future building technologies, our high quality will be the key to our long term success.

Facts & Figures

Year of foundation

1928

Locations

Head Office in Muttenz near Basel, Switzerland.

Subsidiary in Hölstein near Liestal, Switzerland.

Employees

About 230

Core competences

Development, manufacturing, sales and distribution of all types of electrical connections of conductors and also systems for laying power and data cables in the field of building installations.

Custom-made products: Manufacturing and prefabrication of custom products also in small series.

Certified quality

According to ISO 9001 and ISO 14001

At home in Switzerland

Swiss family owned company.

Development and production

100% «made in Switzerland».

International orientation

Woertz subsidiaries in Germany, France and USA.

Representations in more than twenty countries through long-lasting partners.

Head Office in Muttenz

The head office is located in Muttenz where about 180 employees work in the sales, advice and production departments. Specialized in electrical connections we produce here our approved terminal blocks for connecting wires and cables.

Subsidiary in Hölstein

In 1993 Woertz acquired a subsidiary in Hölstein. The about 50 employees there dispose of ultra-modern and partially fully-automated manufacturing devices. Underfloor and modular under-window ducts and also our different cables are produced in Hölstein. Most of the custom products are also manufactured there.

Partner for efficient complete systems

Woertz sells more than products and components... Woertz provides complete solutions

Technique with an attractive packaging

Buildings should not only function well. Either place of residence, of work or of meeting they should also fulfil aesthetic requirements. Our systems and solutions are therefore not only technologically well-trying they also look good. Each project is bound to specifications about construction and design. Together with the project managers we endeavour to find the best possible solutions for each building.

Each project begins with a discussion which is especially important if the planned building is complex. Not only the technique but also all the involved users have to harmonize their functions in order to maximize the efficiency.

Competent advice included

For planners, architects, house builders and investors Woertz is more than a distributor of components and complete systems. The experience acquired during the last decades allows us to achieve the best possible solution for technically challenging buildings. In addition we continuously submit our product line and services to further development.

In the field of building technique no progress means regression. We also demand a great deal of our consulting services. We speak the same language as our customers, we are listening to them, proceed to the planning together, procure the measurements and deliver the solutions on schedule. We carry out an exhaustive analysis of the background, clarify the needs and suggest individual solutions. Woertz guarantees therefore competence and personal advice as well as high quality products.

Swiss Quality

Woertz stands for electrical installation technique, developed and produced in Switzerland - for the whole world.

Experience

Woertz is a competent partner for electrical installation technique for 80 years now. The experience acquired for decades guarantees the best possible results – for each person involved.

Knowledge

Woertz specialists work daily on the simplification of your work. We develop systems with the highest cost-efficiency and safety - tap into our found of expertise!

Innovation

Woertz contributes to the progress of the electrical installation technique thanks to continuous innovations – efficient, cost-effective, safe and simple.

Consulting

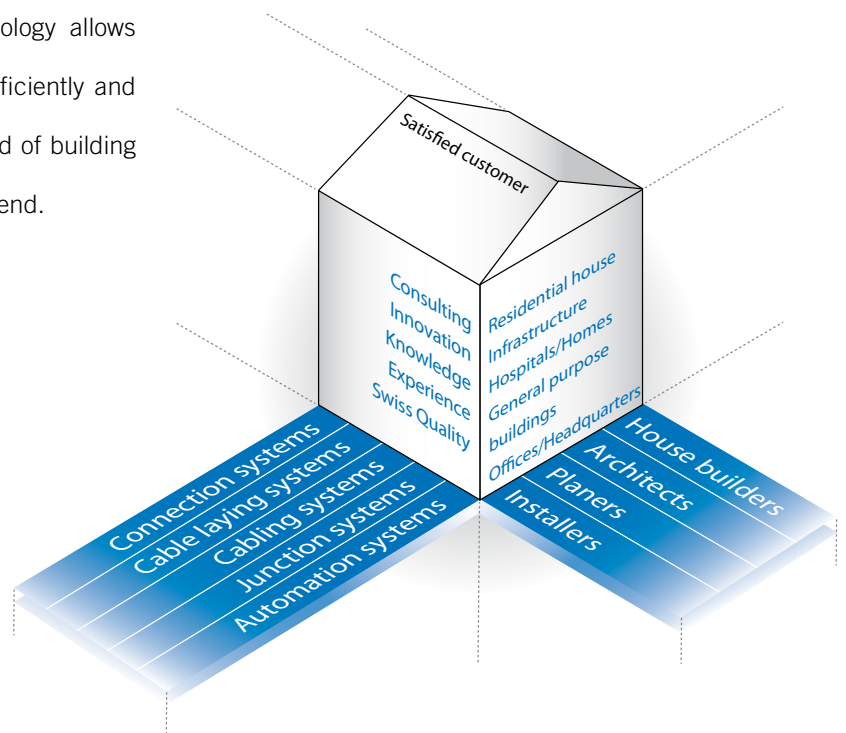

Woertz supports you with technical advice and practical assistance. It begins with a discussion to analyze the situation and clarify the needs. It leads to the suggestion of several solutions – methodical, competent and individual.

Woertz on the move

Woertz has always considered further development as obvious. Our product lines point therefore the way forward. Our terminal blocks have achieved an excellent reputation within Switzerland and abroad. Our flat cable installation systems too. The insulation piercing technology allows connections to be performed quickly and efficiently and with our latest products developed in the field of building automation we are on the way to setting the trend.

In and around the building

Overview of our market performances:

« Talk to us –
we speak the same
language. »

« We share our
experience and
know-how with
our customers. »

You can always count on Woertz

Quality, services and reliable delivery lead to strong partnerships.

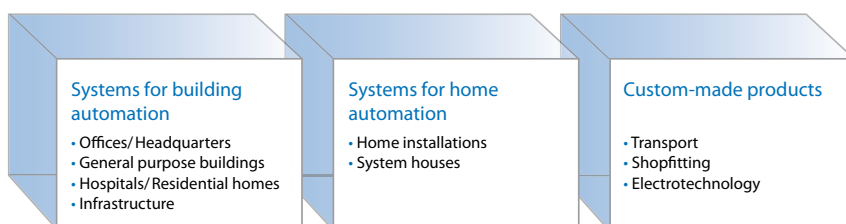

Woertz does not just deliver products to installers and distributors. As a reliable partner we help customers at different levels to achieve their installation project. Our specialists are aware of the trend in that domain and know exactly what the market needs. Electrical codes and specifications are part of our daily routine. This is a guarantee of secure, thought through products and services which comply with the standards.

Woertz will never let you down

Woertz have always been a reliable partner. Our customers bank on the quality of our services. Precisely when the building projects are complex, reliability and accuracy are essential. We strive to achieve this aim and as an experienced producer in the field of electrical installation and building automation we afford our customers the assurance of security and availability. Woertz has been a reliable solution provider for the past 80 years and will continue in the future.

The Markets

Swiss innovations designed in great detail

Each building is different, furthermore the technical and cabling requirements. Our products and solutions are therefore flexible, cost-effective and innovative.

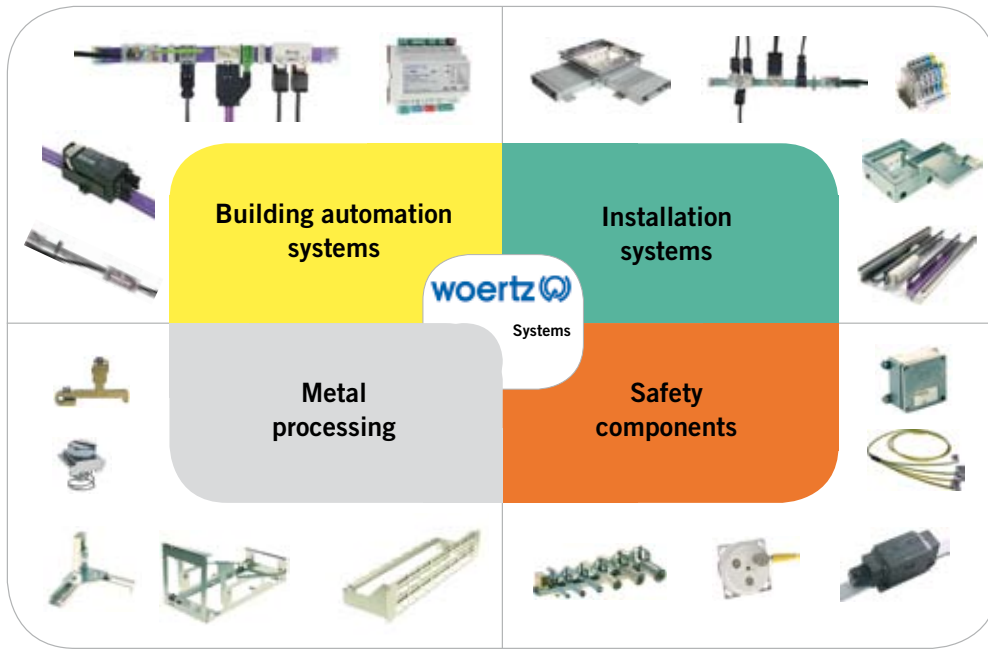

Building automation systems

Modern buildings have to meet a lot of complex requirements. The aim is that people feel comfortable in an environment that improves performance. Besides the energy consumption has to be as low as possible, the buildings have to be easy to modify and cost-effective. All this can be achieved thanks to our automation systems. They are able to control indoor air quality and lighting according to daylight in order to obtain the best possible conditions.

Installation systems

In the field of installation, flexibility and quality are essential. For the building sector our flat cable system enables power current and signals to be transmitted in a flexible, secure and economical way. Our aesthetic cable laying systems allow these cables to be within easy reach, harmoniously integrated with the environment. Our high-quality terminal blocks and branching boxes are also considered to be well-tried connection systems.

Safety components

The safety of persons and goods also belong to our priorities. Our range of products includes therefore various installation components protected against penetration of solid matter (components with IP rating), against contact or overvoltages. The Woertz assortment provides as well solutions for potential equalization and special terminal blocks and cast-iron boxes intended for use in potentially explosive atmospheres.

Metal processing

Take advantage of our know-how based on many years of experience in the field of sheet metal working. On request we manufacture precision parts of aluminium, sheet metal and further materials. CNC milling, laser cutting, bending, welding and powder coating belong to our competence. Our precision parts are adopted to use by numerous world-famous companies in Switzerland and abroad.
